# **Product datasheet**

Specifications

# variable speed drive ATV610 - 11 kW / 15HP - 380...415 V - IP20

ATV610D11N4

# Main

| IVIAIII                            |   |  |  |
|------------------------------------|---|--|--|
| Range of product                   | Easy Altivar 610  |  |  |
| product or component type          | Variable speed drive  |  |  |
| Product specific application       | Fan, pump, compressor, conveyor   |  |  |
| Device short name                  | ATV610  |  |  |
| variant                            | Standard version  |  |  |
| product destination                | Asynchronous motors Synchronous motors  |  |  |
| mounting mode                      | Cabinet mount   |  |  |
| EMC filter                         | Integrated conforming to IEC 61800-3 category C3 with 50 m  |  |  |
| IP degree of protection            | IP20  |  |  |
| Type of cooling                    | Forced convection   |  |  |
| Supply frequency                   | 5060 Hz +/-5 %  |  |  |
| Network number of phases           | 3 phases  |  |  |
| [Us] rated supply voltage          | 380460 V - 1510 %   |  |  |
| Motor power kW                     | 11 kW for normal duty<br>7.5 kW for heavy duty  |  |  |
| Motor power hp                     | 15 hp for normal duty<br>10 hp for heavy duty   |  |  |
| Line current                       | 22 A at 380 V (normal duty) 19.6 A at 460 V (normal duty) 16.4 A at 380 V (heavy duty) 14.6 A at 460 V (heavy duty) |  |  |
| Prospective line Isc               | 22 kA   |  |  |
| Apparent power                     | 15.6 kVA at 460 V (normal duty)<br>11.6 kVA at 460 V (heavy duty)   |  |  |
| Continuous output current          | 23.5 A at 4 kHz for normal duty<br>16.5 A at 4 kHz for heavy duty   |  |  |
| Maximum transient current          | 25.9 A during 60 s (normal duty) 24.8 A during 60 s (heavy duty)  |  |  |
| Asynchronous motor control profile | Constant torque standard Optimized torque mode Variable torque standard   |  |  |
| Output frequency                   | 0.1500 Hz   |  |  |
| Nominal switching frequency        | 4 kHz   |  |  |
| Switching frequency                | 212 kHz adjustable  |  |  |
| number of preset speeds            | 16 preset speeds  |  |  |

| Communication port protocol | Modbus serial   |
|-----------------------------|---|
| Option card                 | Slot A: communication card, Profibus DP V1 Slot A: digital or analog I/O extension card Slot A: relay output card |

# Complementary

| Complementary                 |  |  |
|-------------------------------|--|--|
| Output voltage                | <= power supply voltage  |  |
| Motor slip compensation       | Automatic whatever the load  |  |
|                               | Adjustable   |  |
|                               | Not available in permanent magnet motor law  |  |
|                               | Can be suppressed  |  |
| Acceleration and deceleration | S, U or customized   |  |
| ramps                         | Linear adjustable separately from 0.01 to 9000 s                                   |  |
| Braking to standstill         | By DC injection  |  |
| Protection type               | Thermal protection: motor  |  |
|                               | Motor phase break: motor   |  |
|                               | Thermal protection: drive  |  |
|                               | Overheating: drive   |  |
|                               | Overcurrent between output phases and earth: drive                                 |  |
|                               | Overload of output voltage: drive  |  |
|                               | Short-circuit protection: drive  |  |
|                               | Motor phase break: drive   |  |
|                               | Overvoltages on the DC bus: drive  |  |
|                               | Line supply overvoltage: drive   |  |
|                               | Line supply undervoltage: drive  |  |
|                               | Line supply phase loss: drive  |  |
|                               | Overspeed: drive   |  |
|                               | Break on the control circuit: drive  |  |
| Frequency resolution          | Display unit: 0.1 Hz   |  |
|                               | Analog input: 0.012/50 Hz  |  |
| Electrical connection         | Control, screw terminal: 0.51.5 mm²  |  |
|                               | Line side, screw terminal: 416 mm²   |  |
|                               | Motor, screw terminal: 416 mm²   |  |
| Commonton truns               |  |  |
| Connector type                | 1 RJ45 (on the remote graphic terminal) for Modbus serial                          |  |
| Physical interface            | 2-wire RS 485 for Modbus serial  |  |
| Transmission frame            | RTU for Modbus serial  |  |
| Transmission rate             | 4.8, 9.6, 19.2, 38.4 kbit/s for Modbus serial                                      |  |
| Type of polarization          | No impedance for Modbus serial   |  |
| Number of addresses           | 1247 for Modbus serial   |  |
| Method of access              | Slave  |  |
| Supply                        | External supply for digital inputs: 24 V DC (1930 V), <1.25 mA, protection type:   |  |
|                               | overload and short-circuit protection  |  |
|                               | Internal supply for reference potentiometer (1 to 10 kOhm): 10.5 V DC +/- 5 %, <10 |  |
|                               | mA, protection type: overload and short-circuit protection                         |  |
| Local signalling              | 2 LEDs for local diagnostic  |  |
|                               | 1 LED (yellow) for embedded communication status                                   |  |
|                               | 2 LEDs (dual colour) for communication module status                               |  |
|                               | 1 LED (red) for presence of voltage  |  |
| Width                         | 171 mm   |  |
| II-1-I-I                      |  |  |
| Height                        | 360 mm<br>423 mm with EMC plate  |  |
|                               | ·  |  |
| Depth                         | 233 mm   |  |
| net weight                    | 7.730 kg   |  |
| Analogue input number         | 3  |  |
|                               |  |  |

| Analogue input type  A11, A12, A3 software-configurable voltage: 010 V DC, impedance: 30 kOhm, resolution 12 bits A11, A12, A3 software-configurable current: 020 mA, impedance: 250 Ohm, resolution 12 bits A12, A13 software-configurable temperature probe or water level sensor  Discrete input number  6  |                               |  |  |

| Package 2 Height             | 73.000 cm |
| Package 2 Width              | 60.000 cm |
| Package 2 Length             | 80.000 cm |
| Package 2 Weight             | 36.440 kg |

**Green Premium**<sup>TM</sup> **label** is Schneider Electric's commitment to delivering products with best-inclass environmental performance. Green Premium promises compliance with the latest regulations, transparency on environmental impacts, as well as circular and low-CO<sub>2</sub> products.

**Guide to assessing product sustainability** is a white paper that clarifies global eco-label standards and how to interpret environmental declarations.

# Mounting and Clearance

#### Clearances

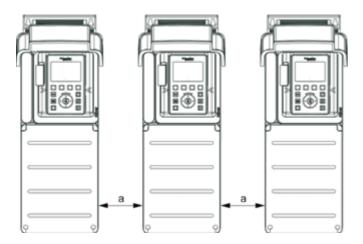

| X1                  | X2                  | X3                 |
|---------------------|---------------------|--------------------|
| ≥ 100 mm (3.94 in.) | ≥ 100 mm (3.94 in.) | ≥ 10 mm (0.39 in.) |

- $_{\bullet}$  Mount the device in a vertical position (±10°). This is required for cooling the device.
- Do not mount the device close to heat sources.
- Leave sufficient free space so that the air required for cooling purposes can circulate from the bottom to the top of the drive.

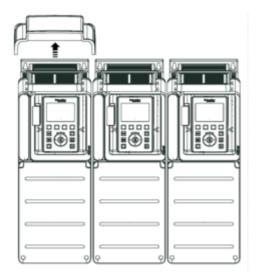

#### **Mounting Types**

#### Mounting Type A: Individual IP21

a ≥ = 100 mm (3.94 in.)

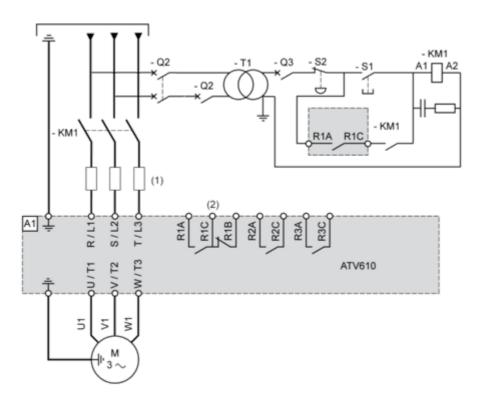

#### Mounting Type B: Side by Side IP20

### ATV610D11N4

#### Connections and Schema

#### Single or Three-phase Power Supply - Diagram With Line Contactor

(1) Line chokes

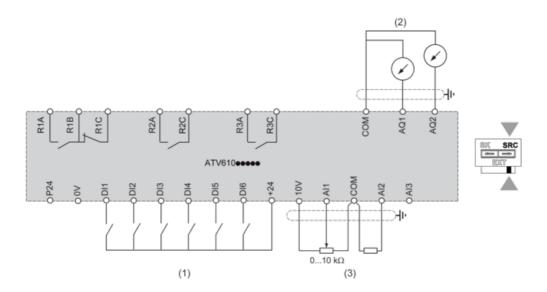

(2) See control block wiring diagram

A1 : Drive

KM1 : Line Contactor Q2, Q3 : Circuit breakers S1, S2 : Pushbuttons

T1: Transformer for control part

#### **Control Block Wiring Diagram**

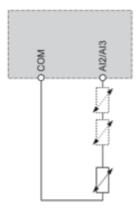

(1) Digital Input (2) Analog Output

(3) Analog Input

R1A, R1B, R1C : Fault relay output R2A, R2C : Sequence relay output R3A, R3C : Sequence relay output

#### **Sensor Connection**

It is possible to connect either 1 or 3 sensors on terminals Al2 or Al3.
